The City Administrator/Clerk shall revise the charges for users or user classes to accomplish the following:

1. Maintain the proportionate distribution of operation and maintenance costs among users and user classes;

2. Generate sufficient revenue to pay the total operation and maintenance costs necessary to the proper operation and maintenance (including replacement) of the treatment works;
3. Apply excess revenues collection from a class of users to the costs of operation and maintenance attributable to that class for the next year and adjust the rate accordingly.

99.12 COST OF TOXIC POLLUTANTS. Each user that discharges any toxic pollutants which cause an increase in the cost of managing the effluent or the sludge of the wastewater treatment works shall pay for such increased cost.

99.13 CHARGES FOR OPERATION AND MAINTENANCE FOR EXTRANEIOUS FLOWS. The costs of operation and maintenance for all flow not directly attributable to users (i.e., infiltration/inflow) shall be distributed among all users of the wastewater treatment facilities on the basis of flow volume of the users.

99.14 INCONSISTENT AGREEMENTS. The user charge system shall take precedence over any terms or conditions of agreements or contracts (such as pre-existing agreements reserving capacity in the City wastewater treatment works or pre-existing agreements regarding charges to be collected by the City in providing wastewater treatment services or reserving capacity) between the City and users (including industrial users, special districts, other municipalities or Federal agencies or installations) which are inconsistent with the requirements of Section 204(b)(1)(A) of the Water Pollution Control Act and implementing Federal regulations.

STORM WATER DRAINAGE SYSTEM UTILITY

<p>88.01 Purpose</p> <p>88.02 Definitions</p> <p>88.03 Storm Water Drainage System Utility Established</p> <p>88.04 Rates</p> <p>88.05 Payment of Bills</p>	<p>88.06 Revenues, Deposits, Disbursements</p> <p>88.07 Lien for Nonpayment</p> <p>88.08 City Council</p> <p>88.09 Prohibited Acts</p> <p>88.10 Right of Entry</p> <p>88.11 Penalties</p>
--	---

88.01 PURPOSE. The purpose of this chapter is to establish a Storm Water Drainage System Utility and provide a means of funding the construction, operation and maintenance of storm water management facilities including, but not limited to, detention and retention basins, storm water sewers, inlets, ditches and drains, and cleaning of streets. The Council finds that the construction, operation and maintenance of the City’s storm and surface water drainage system should be funded through charging users of property which may connect or discharge directly, or indirectly, into the storm and surface water drainage system.

88.02 DEFINITIONS. For use in this chapter, unless the context specifically indicates otherwise, the following terms are defined:

1. “Connection” means the physical act or process of tapping a public storm water sewer or drainage line, or joining onto an existing side sewer, for the purpose of connecting private impervious surface or other storm and surface water sources or systems to the public storm and surface water system. It also includes creation or maintenance of impervious surface that causes or is likely to cause an increase in the quantity or decrease in quality or both from the natural state of storm water runoff, and which drains, directly or indirectly, to the storm and surface water system.
2. “Storm and surface water drainage system” means any combination of publicly owned storm and surface water quantity and quality facilities, pumping, or lift facilities, storm and secondary drain pipes and culverts, open channels, creeks and ditches, force mains, laterals, manholes, catch basins and inlets, including the grates and covers thereof, detention and retention facilities, laboratory facilities and equipment, and any other publicly owned facilities for the collection, conveyance, treatment and disposal of storm and surface water system within the City, to which sanitary sewage flows are not intentionally admitted.
3. “Unit” means each household, each place of commerce/education/ government/religion, or each industry, whether in a single building on a single lot or in a multiple-use building on a single lot or multiple lot complex. Each unit shall be charged individually, but where the complex is billed under one combined service account, the recipient of that bill shall be deemed the user and receive the total combined storm water drainage system charge for that complex.
4. “User” means any person who uses any property located in city limits that maintains connection to, discharges to, or otherwise receives services from the City for storm water management. The occupant of occupied property is deemed the user. If the property is not occupied, the person who has the right to occupy it shall be deemed the user.

88.03 STORM WATER DRAINAGE SYSTEM UTILITY ESTABLISHED. Pursuant to the authority of Section 384.84[5] of the Code of Iowa, the entire City is hereby declared a Storm Water Drainage System District for the purpose of establishing, imposing, adjusting and providing for the collection of rates for the operation and maintenance of storm water management facilities. The entire City, as increased from time to time by annexation, shall constitute a single Storm Water Drainage System District. The Storm Water Drainage System shall be operated as a public utility with revenues derived subject to the provisions of this chapter. The Administrator of the Storm Water Drainage System shall be the City Administrator/Clerk and Public Works Director of the City of Fayette.

(Code of Iowa, Sec. 384.84[1])

88.04 RATES. Each user shall pay for storm and surface water drainage system service provided by the City. The rates for the operation and maintenance of the storm water management facilities shall be collected by imposing a monthly rate on each residential, commercial and industrial user within the City. The service charges shall be billed as part of a combined service account which means a customer service account for the provision of two or more utility services. The Council may adopt rules, charges, rates, and fees for the use of the City’s storm and surface water system, and for services provided by the City relating to that system. Such rules may include delinquency and interest charges and penalties. Such charges and fees shall be just and equitable based upon the actual costs of operation, maintenance, acquisition, extension and replacement of the City’s system, the costs of bond repayment, regulation, administration, and services of the City. The rates for the foregoing functions shall be collected by imposing a quarterly rate of three dollars (\$3.00) on all city utility bills. Property owned by the City is exempt from the requirements of this chapter.

88.05 PAYMENT OF BILLS. All Storm Water Drainage System charges shall be due and payable under the same terms and conditions provided for payment of a combined service account as contained in Section 92.04 of this Code of Ordinances. All City services may be discontinued in accordance with

the provisions contained in Section 92.05 if the combined service account becomes delinquent, and the provisions contained in Sections 92.06 and 92.08, relating to lien exemptions and lien notices shall also apply in the event of a delinquent account.
